

WHY 5% DUTY COULD BE TOO MUCH DUTY

If your imported goods are not currently enjoying a free rate of duty by utilising free trade then the tariff concession system (TCS) could be your answer to saving on duty TODAY....

ABOUT TARIFF CONCESSIONS

The TCS allows for the duty-free entry of goods into Australia on the basis there are no local Australian manufactures of substitutable goods.

There are some product exceptions including foodstuffs, clothing and passenger motor vehicles.

Benefits to Your Business

- Reduction of duty from 5% to free
- Increased product profitability
- Increase bottom line profit
- Increased market competitiveness

Sounds Interesting Right.....Here's What You Need To Do

If you are in the process of launching a new product with an anticipated duty exposure call Stockwell International now to assess whether your product is suitable for a new tariff concession application. By submitting the application prior to the goods first arrival you will be maximising your duty savings.

But what if my goods have arrived?

If your goods have arrived but are yet to be customs cleared, call us to discuss the option of an express tariff concession application to cover the imported product. Whilst you will have an initial duty liability to pay for these goods you will be able to claim back the duty that was paid by way of a refund application on the tariff concessions approval.

How We Help

We are experts in tariff concession application and aim to make the process as easy on you as possible. All we need to get started is information on the goods to be imported (and
